LAND DISPOSAL RESTRICTED AND PROHIBITED WASTE NOTICE AND CERTIFICATION

The wastes identified on manifest # MINITED and bearing the EPA Hazardous Waste Code(s) listed below are subject to the land restrictions of 40 CFR Part 268. The required information applicable to each waste is identified below:

()	●	6	O	The wastes do not meet the treatment standards specified in Part 268 Subpart D or do not meet the prohibitions specified in 268.32 or RCRA Section 3004(d).
11a.	11b.	11c.	11d	
O	O	O	O	The wastes comply with the treatment standards specified in Part 268 Subpart D and all applicable prohibitions set forth in 268.32 or RCRA Section 3004(d).
11a.	11b.	11c.	11d	

Yes* No	n/a

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIP®

THE ENVIRONMENTAL QUALITY COMPANY

Contact: Doug Mueller Brass

Schedule Confirmation

Phone: (810) 987-7770 Fax: (810) 987-7321

EQ Facility: Michigan Disposal Waste Treatment Plant 49350 North 1-94 Service Drive, Belleville, Michigan 48111

January 3, 2006

Scheduled Time: 01/17/2006 11:00 AM

Confirmation #: 60820

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504 / MUELLER BRASS COMPANY Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ . The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIPS.

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION F

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

- * See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

 Fire
- * If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIPS.

EQ Facility: Michigan Disposal Waste Treatment Plant 49350 North I-94 Service Drive, Belleville, Michigan 48111

February 6, 2006

Scheduled Time: 02/23/2006 02:00 PM

Confirmation #: 61890

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504 / MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ · The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIPS

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

- * See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".
- * If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

Comment: RESCHEDULED TO MONDAY 2 28/05 AT 110PM PER DOUG

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).

- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not **effective** in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

THE ENVIRONMENTAL QUALITY COMPANY

ontact: Doue Mueller Brass

Schedule Confirmation

Phone: (810) 987-7770 Fax: (810) 987-7321

EQ Facility: Michigan Disposal Waste Treatment Plant 49350 North I-94 Service Drive, Belleville, Michigan 48111

March 15, 2005

Scheduled Time: 03/22/2005 01:40 PM

Confirmation #: 51922

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: p002

Generator: MID005357504/MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X Thank you for scheduling with EQ - The Environmental Quality Company.

Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIPE

Instructions

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

THE ENVIRONMENTAL QUALITY COMPANY &

Contact: Doug Mueller Brass

Schedule Confirmation

Phone: (810) 987-7770 Fax: (810) 987-7321

EQ Facility: Michigan Disposal Waste Treatment Plant 49350 North I-94 Service Drive, Belleville, Michigan 48111

April 18, 2005

Scheduled Time: 04/28/2005 03:00 PM

Confirmation #: 53214

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504 / MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIP:

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

EQ Facility: Michigan Disposal Waste Treatment Plant 49350 North I-94 Service Drive, Belleville, Michigan 48111

May 31, 2005

Scheduled Time: 06/15/2005 02:00 PM

Confirmation #: 54688

Quantity: 1600 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504 / MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.

* Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

Instructions

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

MAIN LINE ITEM #	1. HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBPART CC YES/NO	4. SUBCATEGORY	5. HOW MUST THE WASTE BE MANAGED?	6. REFERENCE NUMBER(S)

EQ Facility: Michigan Disposal Waste Treatment Plant

49350 North 1-94 Service Drive, Belleville, Michigan 48111

July 6, 2005

Scheduled Time: 07/19/2005 01:20 PM

Confirmation #: 55768

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: D002

Phone: (810) 987-7770

Fax: (810) 987-7321

Generator: MID005357504 / MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park not stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

THE ENVIRONMENTAL QUALITY COMPANY

Contact: Doug Mueller Brass

Schedule Confirmation

Phone: (810) 987-7770 Fax: (810) 987-7321

EQ Facility: Michigan Disposal Waste Treatment Plant

49350 North I-94 Service Drive, Belleville, Michigan 48111

August 17, 2005

Scheduled Time: 08/30/2005 01:20 PM

Confirmation #: 57046

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504 / MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

MAIN LINE ITEM #	1. HAZARDOUS WASTE CODE(S)	2. NWW or WW	3. SUBPART CC YES/NO	4. SUBCATEGORY	5. HOW MUST THE WASTE BE MANAGED?	6. REFERENCE NUMBER(S)

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

Schedule Confirmation

Phone: (810) 987-7770 Fax: (810) 987-7321 EQ Facility: Michigan Disposal Waste Treatment Plant 49350 North I-94 Service Drive, Belleville, Michigan 48111

October 3, 2005

Scheduled Time: 10/1:/2005 12:10 PM

Confirmation #: 58232

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504/MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ. The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park not stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIP®

- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

THE ENVIRONMENTAL QUALITY COMPANY

Contact: Doug Mueller Brass

Schedule Confirmation

Phone: (810) 987-7770 Fax: (810) 987-7321

EQ Facility: Michigan Disposal Waste Treatment Plant 49350 North I-94 Service Drive, Belleville, Michigan 48111

November 8, 2005

Scheduled Time: 12/01/2005 01:10 PM

Confirmation #: 59235

Quantity: 1600 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504 / MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North 1-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-targed and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIPE

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC: inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- Contact may explode when heated.

PUBLIC SAFETY

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations

EVACUATION

Soili

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions, also, consider initial evacuation for 800 meters (1/2mile) in all directions.

MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIP®

INSTRUCTIONS

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

TELL SYNTHER

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

MANIFEST NUMBER:

MI8751183

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- I rucks transporting to or from the facility shall neither park nor stand on the \$ 127.13 ... North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

	INSTRUCT	IONS		

- In Column 1 identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. [If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

March 22, 2004

Scheduled Time: 04/12/2004 01:00 PM

Confirmation #: 40619

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504

MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS, A PRODUCTIVE PARTNERSHIP

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- Contact may explode when heated.

HIRITAGE STATES AND THE PROPERTY OF THE PROPER

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

D005357504 MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park not stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIPE.

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

יון ביי דביי בין און און פון און

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

EQ Facility: Michigan Disposal Waste Treatment Plant 49350 North I-94 Service Drive, Belleville, Michigan 48111

May 26, 2004

Fax: (810) 987-7321

Scheduled Time: 06/02/2004 01:00 PM

Confirmation #: 42686

Quantity: 2000 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504

MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- · All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- . Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-targed and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest,

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532. YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIP®

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

PUBLIC SAFETY

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

EMERGENCY PHONE NUMBER: 810-987-7770

WASTE MATERIAL DESCRIPTION:

WASTE CORROSIVE LIQUID, N.O.S.

8, UN1760, PG I (CONTAINS SODIUM HYDROXIDE)

MANIFEST NUMBER:

MI9061419

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

PUBLIC SAFETY

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company.
Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIPS

Schedule Confirmation

EQ Facility: Michigan Disposal Waste Treatment Plant

49350 North I-94 Service Drive, Belleville, Michigan 48111

July 15, 2004

Scheduled Time: 07/29/2004 01:00 PM

Confirmation #: 44270

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504

MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-targed and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532. YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIP®

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

: 10 | E | E | E | 27 1 1 2 2 2 1 1

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.

And the second second

- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions.

Schedule Confirmation

EQ Facility: Michigan Disposal Waste Treatment Plant 49350 North I-94 Service Drive, Belleville, Michigan 48111

September 2, 2004

Scheduled Time: 09/14/2004 12:00 PM

Confirmation #: 45793

Quantity: 1500 GAL

Approval: 111896MM

Primary Waste Code: D002

Generator: MID005357504

MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIPE

MANIFEST NUMBER:

MI9061440

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

MANIFEST NUMBER:

MI9061476

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.

MUELLER BRASS COMPANY

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-tarped and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas.
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532. YOUR BUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIP.

MUELLER BRASS COMPANY

Fax: (810) 987-7321

Common Name: FORM TUBE ALKALINE CLEANER/SM 323X

Thank you for scheduling with EQ - The Environmental Quality Company. Your appointment is scheduled for Michigan Disposal Waste Treatment Plant.

- Wastes shipped to MDWTP must be placed into closed containers or covered during transportation. The structural integrity of the waste containers must prevent leaking while in transit.
- All trucks transporting to or from the facility shall use Rawsonville Road to enter and exit the facility.
- Trucks transporting to or from the facility shall neither park nor stand on the North I-94 Service Drive.
- Following sampling at MDWTP vehicles are to be closed or re-targed and shall remain closed while waiting to empty.
- Personal Protective Equipment is required in all unloading areas
- Please ensure all necessary Land Disposal Restriction forms accompany the manifest.

If you have any questions, please call the scheduling department at 1-800-875-8722 or fax us at 1-734-699-1532.

YOUR RUSINESS. OUR SOLUTIONS. A PRODUCTIVE PARTNERSHIPS

- In Column I identify all USEPA hazardous waste codes that apply to this waste approval/shipment in the spaces provided below.
- In Column 2, identify the appropriate treatability group for each waste code: Non-Wastewater (NWW) or Wastewater (WW).
- In Column 3, in accordance with Subpart CC identify whether or not your waste contains >500 ppmw VOC (YES or NO), as identified as CCVOC in Attachment 1.
- In Column 4, enter the appropriate Subcategory, (See 268.40), if applicable, and also enter "Debris" if the waste is debris that will be treated using one of the alternative treatment technologies provided by 268.45.
- In Column 5, reference the appropriate paragraph(s) from Page 2 and 3 of this form. If your waste is surcharge exempt, please fill out paragraph N (On page 3).
- To expedite your approval, specify the concentration level of each constituent identified in your waste stream on Attachment 1. When shipping your waste, transfer the appropriate Reference Number(s) from Table 1 to Column 6 below, concentration data does not need to be entered in Attachment 1. If the waste is a California List Waste, complete the boxes below appropriately and identify (in Column 6) the Reference Number(s) of the appropriate California List constituent(s) found in Attachment 1, Table 3.]

GUIDE 154

Substances-toxic and/ or Corrosive (Non-Combustible)

NAERG96

POTENTIAL HAZARDS

HEALTH

- * TOXIC; inhalation, ingestion, or skin contact with material may cause severe injury or death.
- * Contact with molten substance may cause severe burns to skin and eyes.
- * Avoid any skin contact.
- * Effects of contact or inhalation may be delayed.
- * Fire may produce irritating, corrosive and/or toxic gases.
- * Runoff from fire control or dilution water may be corrosive and/or toxic and cause pollution.

FIRE OR EXPLOSION

- * Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive and/or toxic fumes.
- * Some are oxidizers and may ignite combustibles (wood, paper, oil, clothing, etc.).
- * Contact with metals may evolve flammable hydrogen gas.
- * Contact may explode when heated.

CALL Emergency Response Telephone Number on Shipping Paper first. If Shipping Paper not available or no answer, refer to appropriate telephone number listed on the inside back cover.

- * Isolate spill or leak area immediately for at least 25 to 50 meters (80 to 160 feet) in all directions.
- * Keep unauthorized personnel away.
- * Stay upwind.
- * Keep out of low areas.
- * Ventilate enclosed areas.

PROTECTIVE CLOTHING

- * Wear positive pressure self-contained breathing apparatus (SCBA).
- * Wear chemical protective clothing which is specifically recommended by the manufacturer.
- * Structural firefighters' protective clothing is recommended for fire situations ONLY; it is not effective in spill situations.

EVACUATION

Spill

* See the Table of Initial Isolation and Protective Action Distances for highlighted substances. For non-highlighted substances, increase, in the downwind direction, as necessary, the isolation distance shown under "PUBLIC SAFETY".

Fire

* If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2mile) in all directions.
